Exterior Applications

Unmatched Exteriors with G-Ext®

G-Ext® decorative exterior panels are extra resistant to all harsh weather conditions and direct sunlight. G-Ext® is often preferred in exterior applications due to its easy formability, easy processing and easy application with other exterior materials. G-Ext® panels are always one step ahead of equivalent products with many technical features such as not being free of asbestos, chlorides and toxic substances, easy cleaning, high resistance to impact and mechanical pressures, abrasion and cracking, fire resistance, color stabilization, as well as more than 200 decoration options.

Water Repellent Surface

Ultra Resistance to Hot and Cold Transitions

Ultra Impact Resistance

Easy to Clean

Ultra Resistance to Dry Heat

Exceptional Colour Depth

Ultra Scratch and Abrasion Resistance

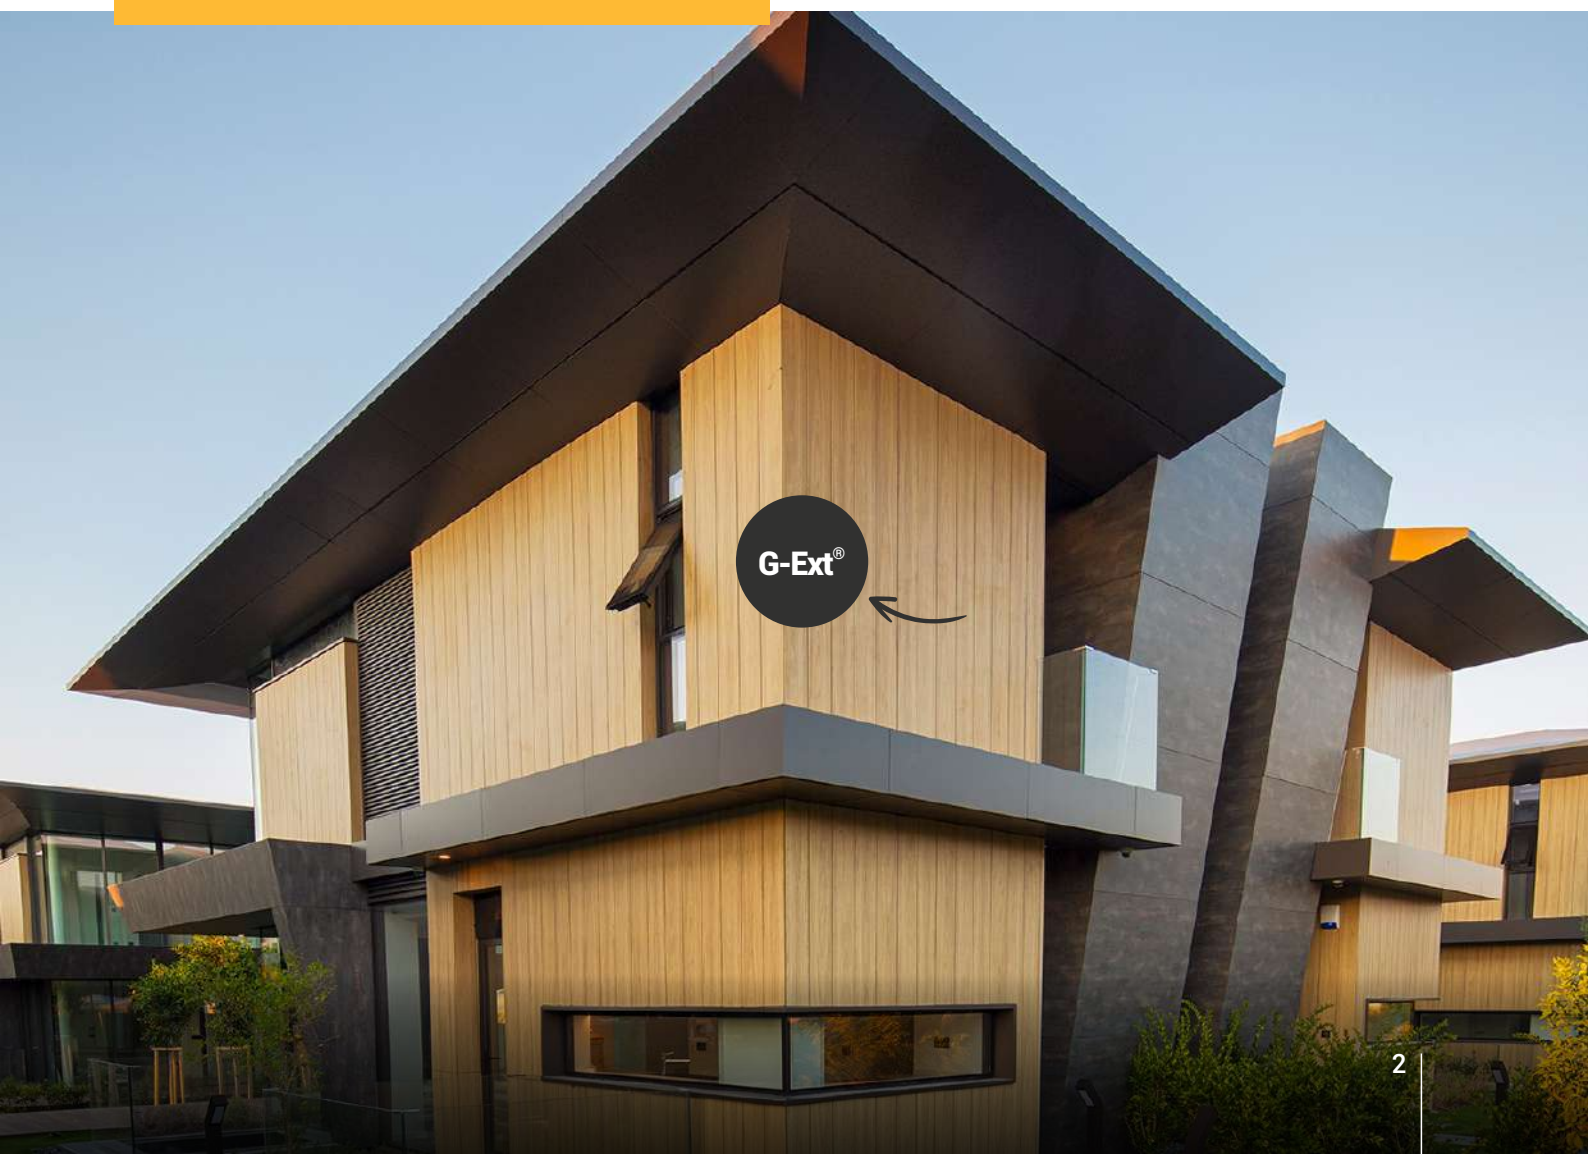

Ultra Chemical Resistance

Low Light Reflectivity

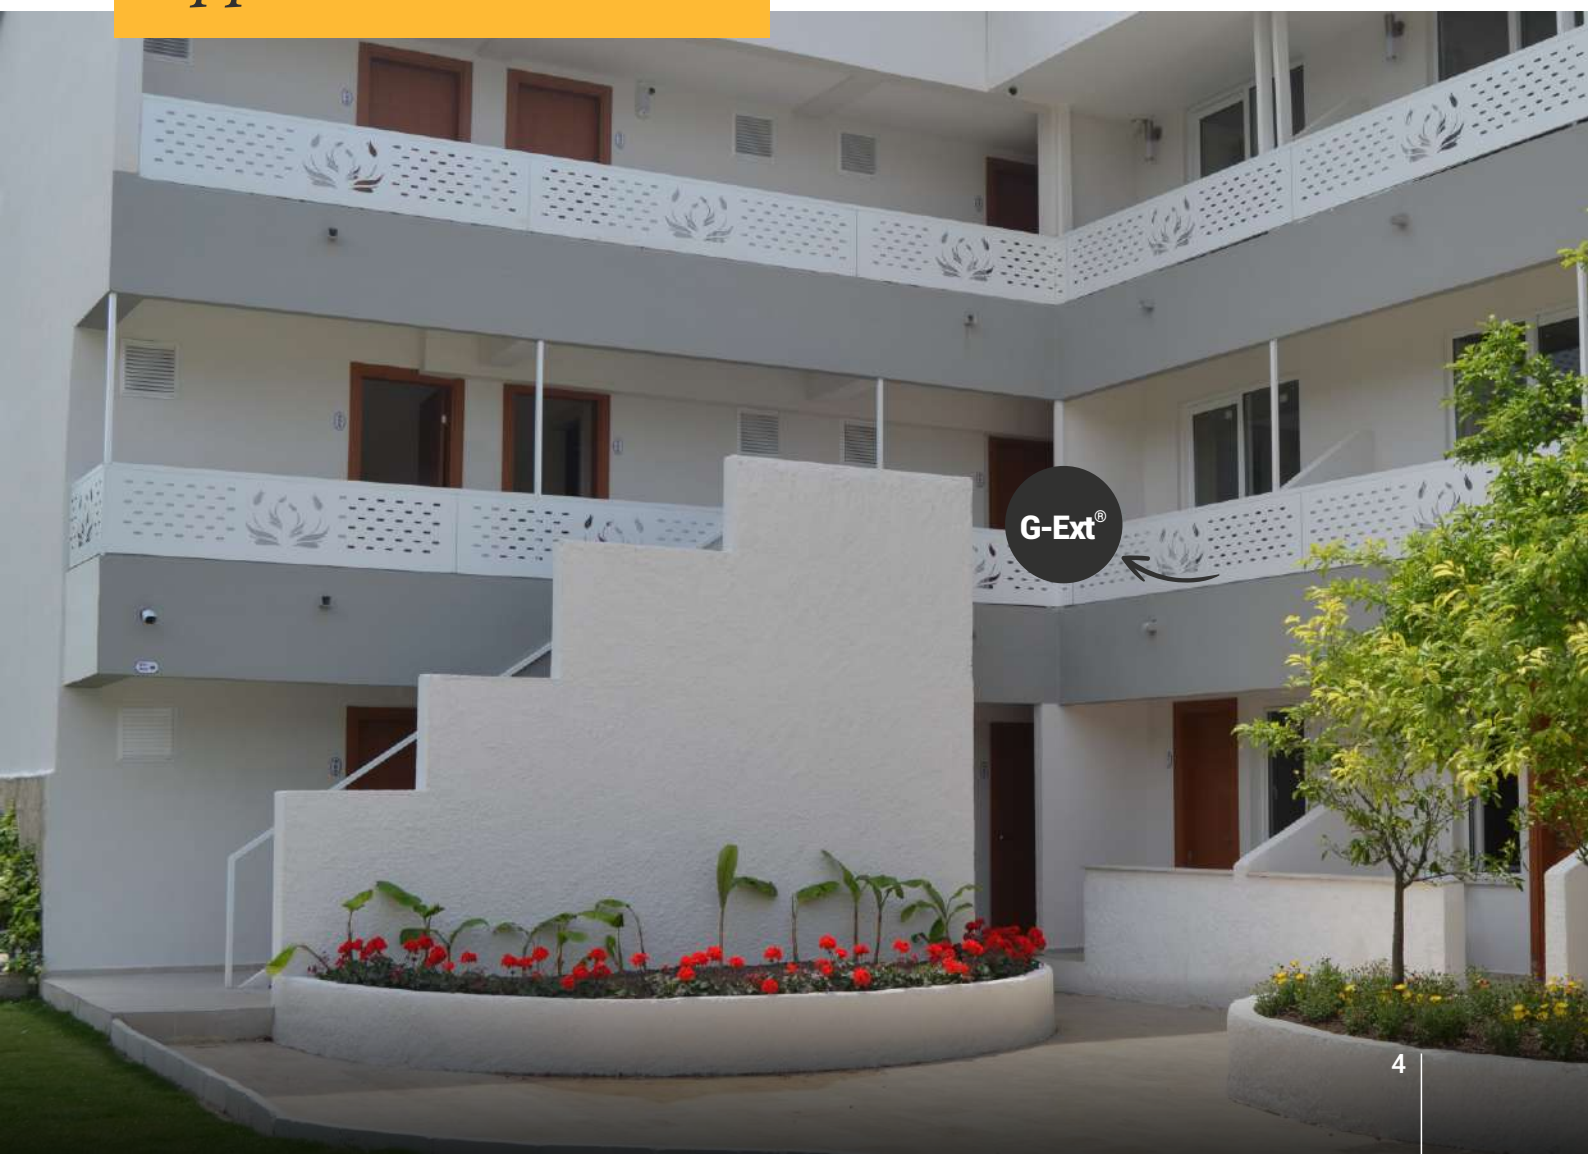

Fire-Resistance

Balcony Applications

Door - Lift Applications

Durable Spaces with G-Com®

With its easy-to-clean surface, high impact and abrasion resistance, high resistance to bacteria, water and moisture, and a wide range of decor and texture options, G-Com® is often preferred in door and lift applications. The use of fire-resistant products in common areas has become more important with changing standards. With its fire resistance feature, G-Com® complies with the fire standards applied in Turkey (TSE) and European Union norms (EN).

Kitchen Applications

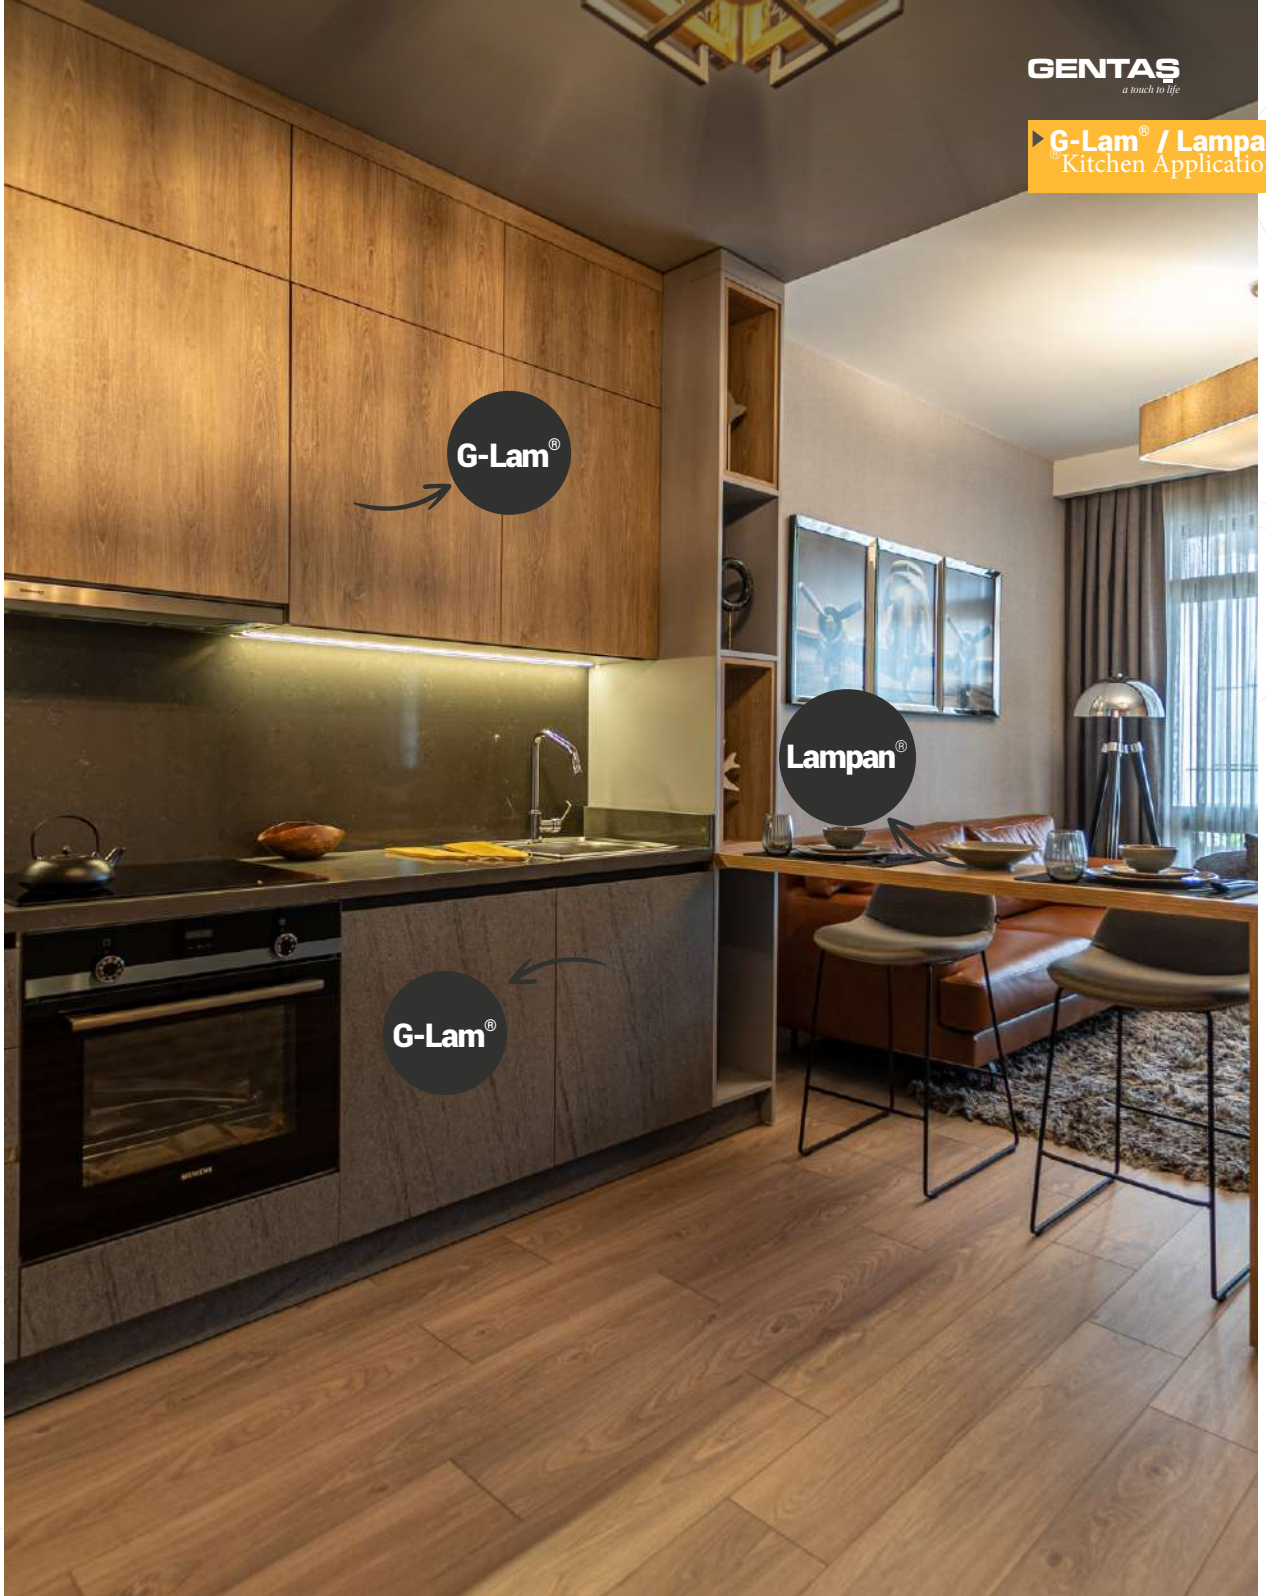

Zero® with High Surface Technology

ZERO®, leaving no fingerprints thanks to its high surface technology, stands out in every area where it is utilized with its extra resistance to scratches and abrasions, and water-repellent, easy-to-clean, smooth and soft surface. Suitable for food contact, Zero® is often preferred in kitchen applications with its antibacterial properties.

Unlimited High Technology Designs with Zeroflex®

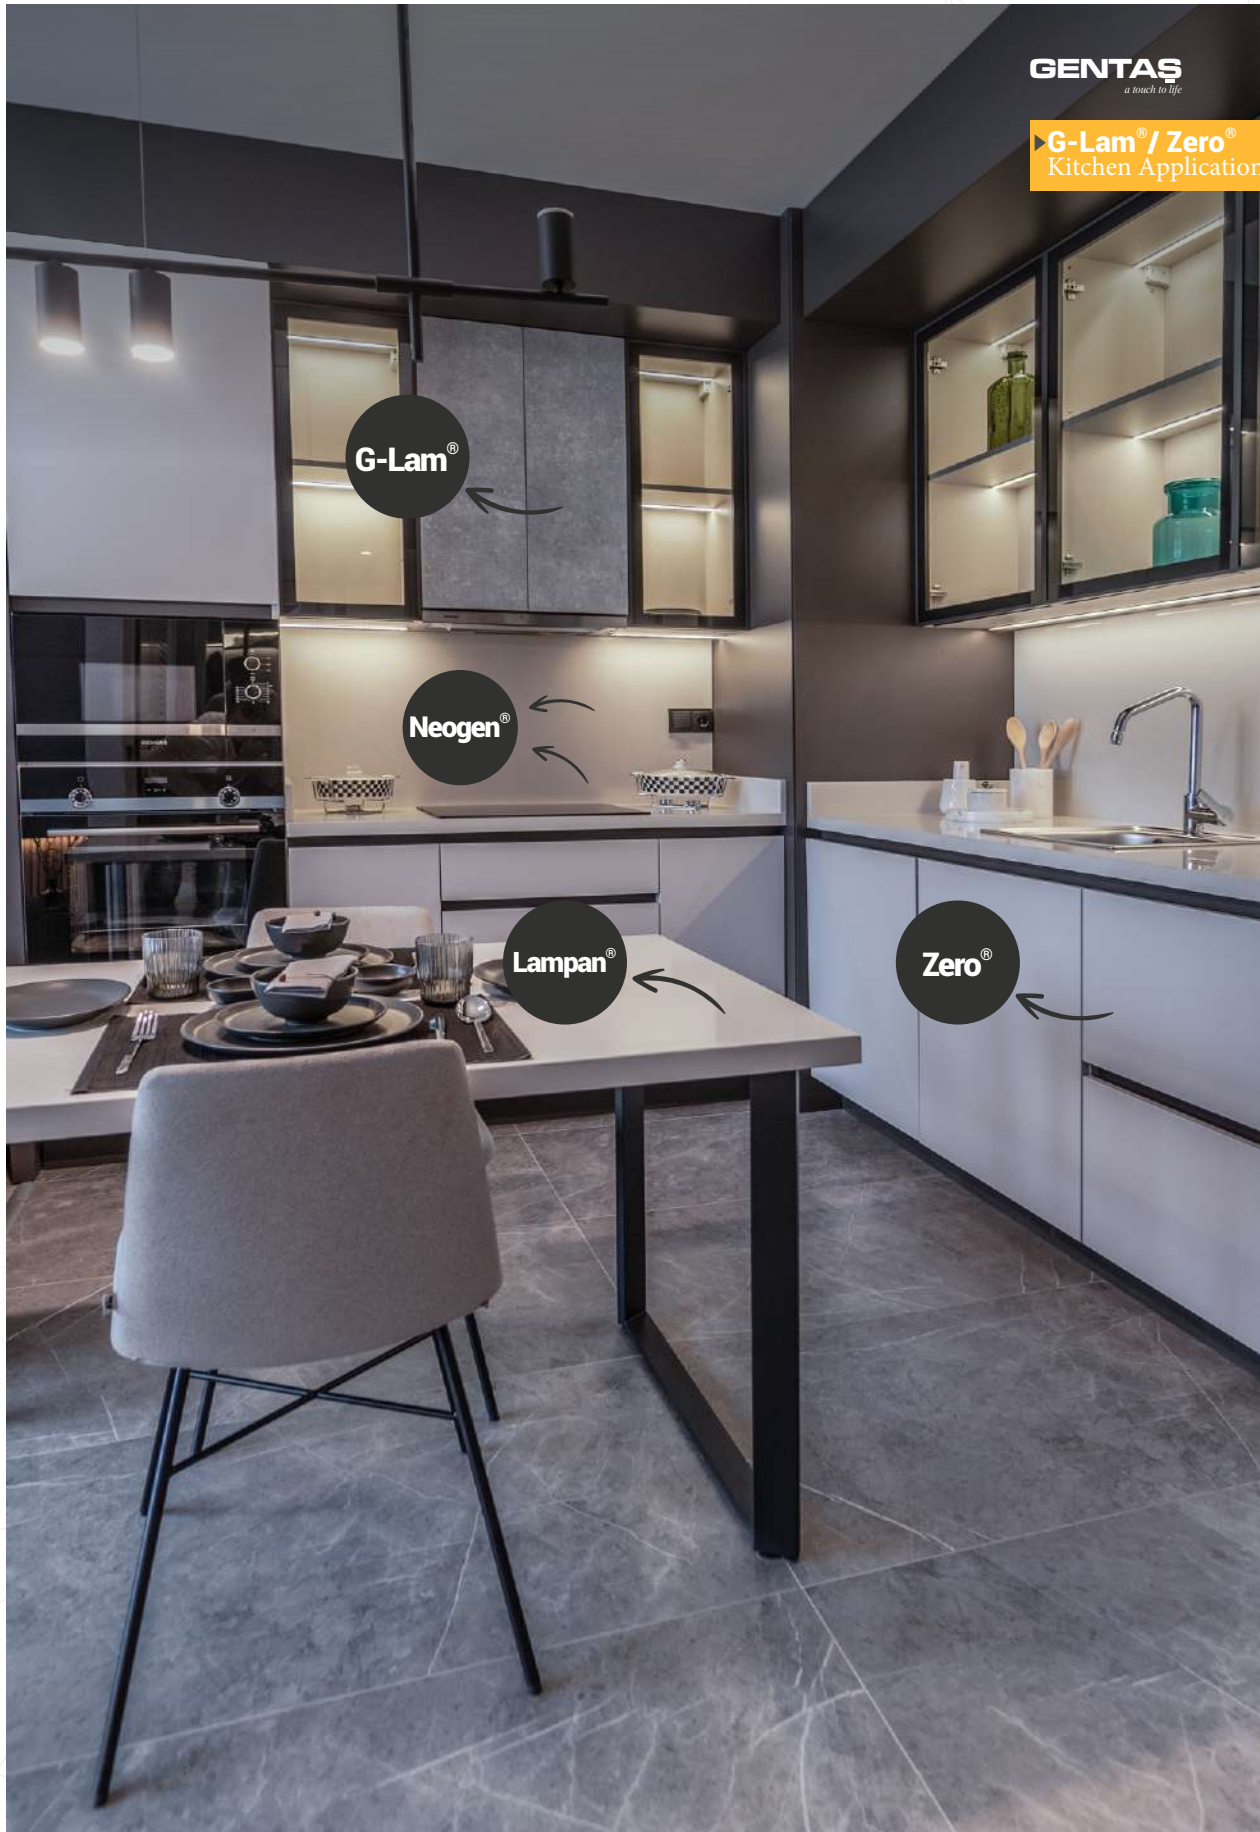

Developed with new generation acrylic resin, Zeroflex® is a postforming decorative laminate that combines both the technical and aesthetic aspects of laminate. Having high resistance to industrial chemicals and scratches, Zeroflex® offers you a multifunctional and innovative surface technology with its smooth surface that leaves no fingerprints and allows you to feel the natural touch of wood, while spicing up your designs with a wide range of decoration alternatives.

LAMPAN

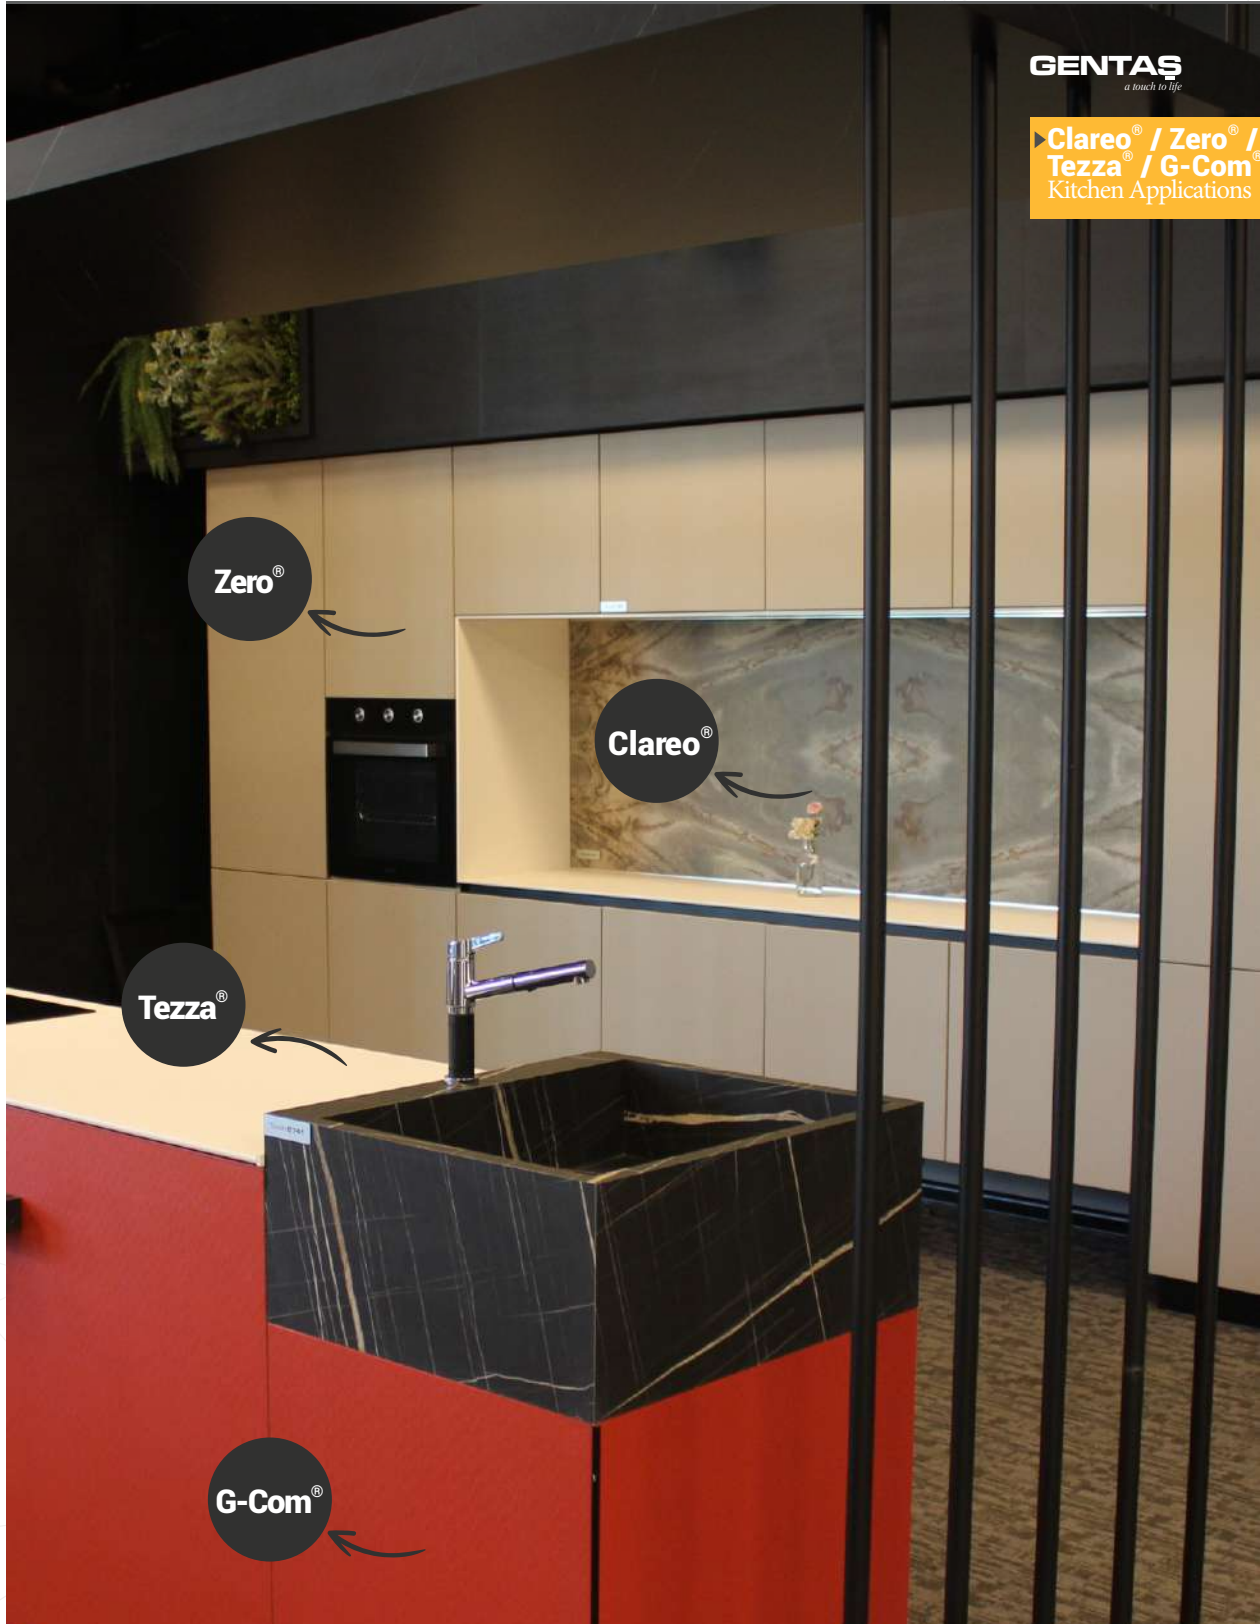

Lampan, which is available in two different panel shapes, MDF or Chipboard, with 18mm thickness, 1220x2440mm and 1220x2800mm dimensions, provides efficiency and speed to your applications with its rich color and surface options that will ensure design integrity with other Gentaş branded products.

Flawless Countertops with Tezza

Designed specifically for kitchen countertops in line with emerging trends, Tezza allows you to achieve a seamless look on countertops with a wide range of decoration and surface options. You and your loved ones are safe with Tezza's scratch-resistant, easy-to-clean, water-resistant and hygienic surface structure suitable for food contact.

Reshaping Living Spaces with Clareo

Standing out with its light reflection and illumination features, Clareo provides a modern look to living spaces. Clareo, a 2.50mm thick, 1200x2400mm translucent laminate, offers decorative solutions that offer you design aesthetics in many areas such as ceilings, columns and counter covers.

Furniture Applications

Natural Spaces with G-Pan®

Available in 18 mm, 18 mm, 25 mm and 30 mm thickness and 12100x3600 mm dimensions, melamine-coated panel G-Pan® combines the naturality of wood with the quality of Gentaş thanks to its different surface shapes and decoration alternatives.

G-Pan® provides the need for melamine-coated chipboard and MDF with thematic features and costly advantages.

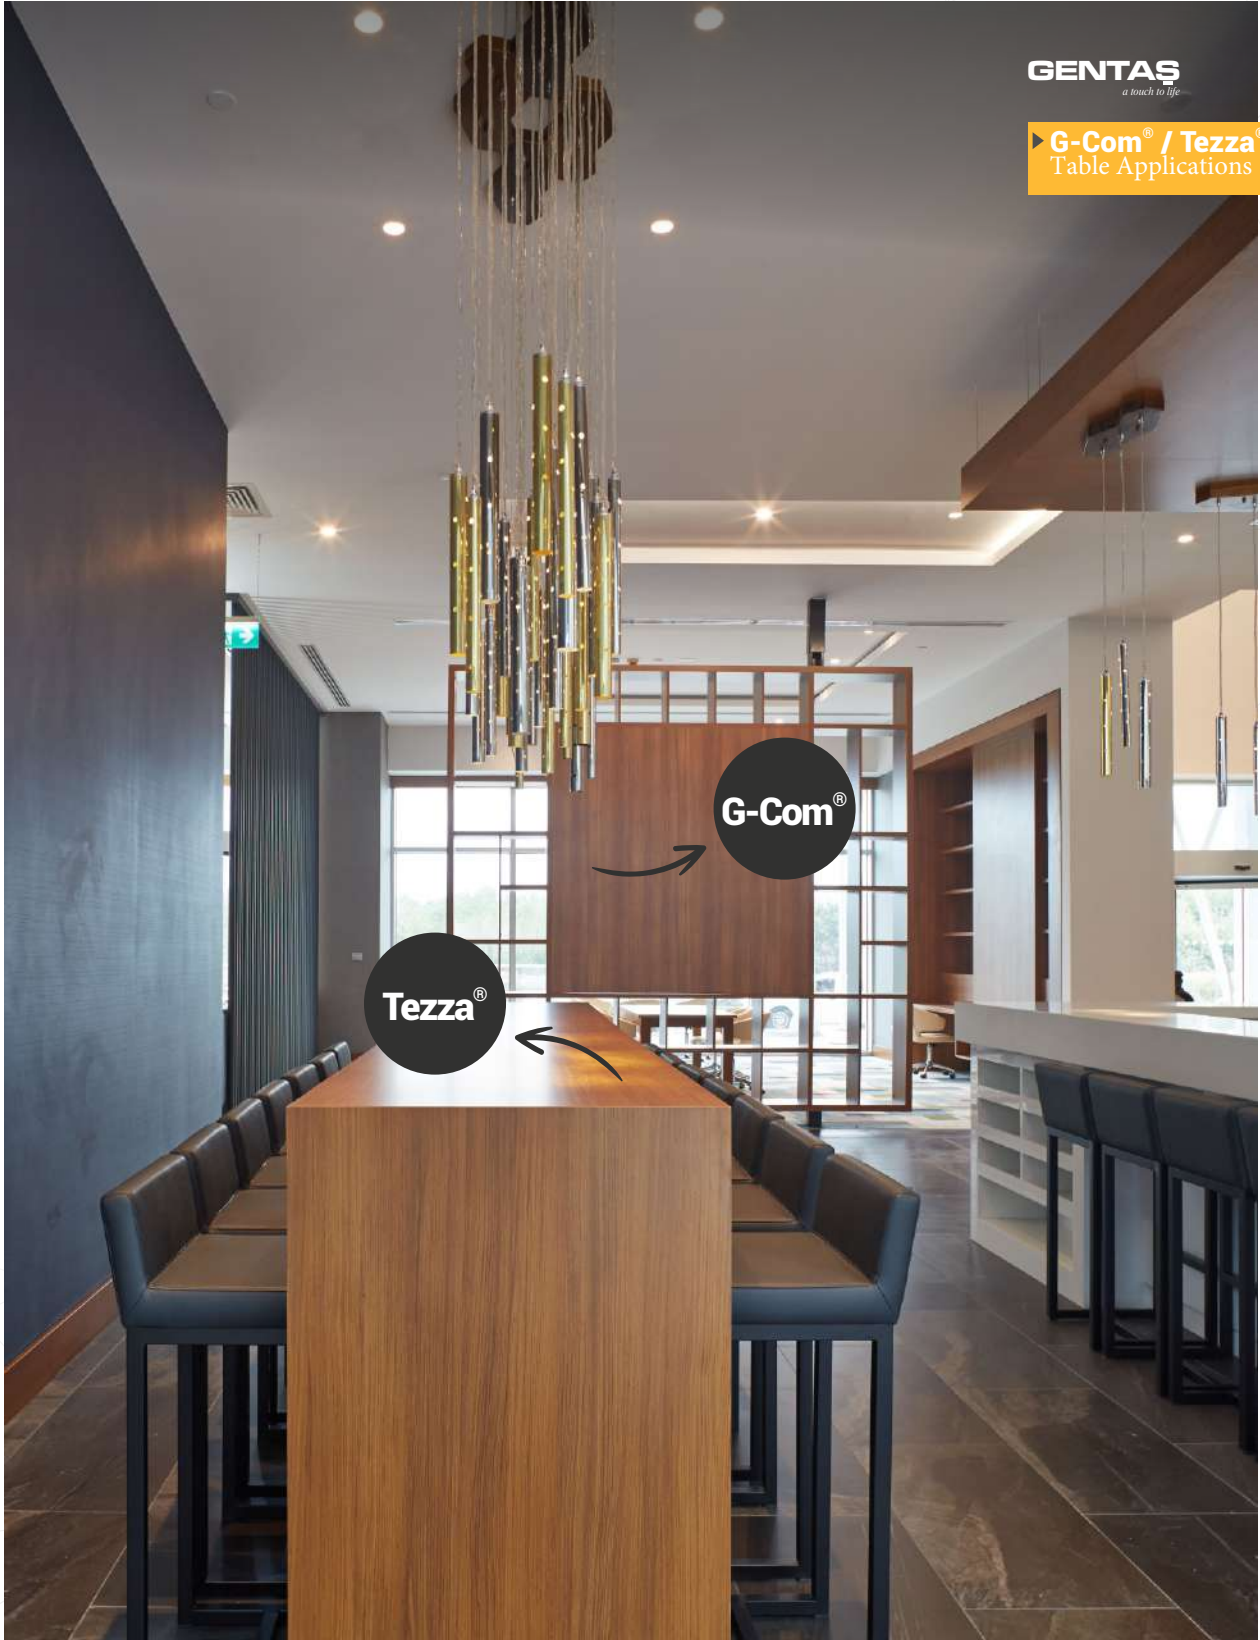

Flexibility Meets Laminate G-Flex®

G-Flex® is a flexible laminate for use in different application systems such as doors, door frames and floor profiles.

Thanks to its strong surface properties, it minimizes labor costs and time spent, allowing you to save on painting and coating costs.

Recommended for use on vertical surfaces, especially in areas requiring sharp turns. Used on doors, frames and general profiles.

Durable Spaces with G-Com®

With its compact structure that provides zero fragility and its impact-resistant surface, G-Com®, which is available in more than 10 sizes, more than 500 color options and more than 30 surface combinations between 2 mm - 25 mm thickness, offers you freedom of design in movable and fixed furnitures.
